TECHNICAL DETAILS

MATERIAL

EXTERNAL SHELL:
ABS

INTERNAL SHELL:
HD Expanded Polystyrene

HEADBAND:
Soft PA Nylon

STANDARD

EN 14052
Protection against front, rear and side impacts in conformity with EN 12492
Clauses 4.2.1.2, 4.2.1.3, 4.2.1.4
shock energy absorption capacity
Protection from impacts and penetration in conformity with EN 397
Clause 5.1.1 Shock Absorption
Clause 5.1.2 Penetration Resistance
EN 397 additional tests: LD

SIZE

Universal-adjustable
from 51 to 63 cm

WEIGHT

450 g

TEMPERATURE OF USE

-10°C / +50°C

CATEGORY

II

TECHNOLOGIES

QUICK FIT SYSTEM

Size adjustment system for maximum stability, easy to use thanks to a large diameter wheel.

VENTILATION CHANNELS

Designed with 10 air intakes and internal channels for enhanced breathability and wearer comfort.

2DRY LINER

A quick-drying fabric with moisture-wicking technology that accelerates the dispersion of sweat to the surface of the helmet padding for a drier, more comfortable wear.

VISOR ATTACHMENT POINTS

Helmet designed with attachment points for securing KASK eye protection accessories.

RING TO HOOK

Chinstrap loop that enables the wearer to securely attach the helmet to a harness or other items.

INTEGRATED LAMP CLIPS

Designed with 4 built-in, nylon lamp attachment points. Compatible with KASK headlamps and other headlamps with elastic bands.

EARMUFF ADAPTER ATTACHMENT POINTS

Helmet designed with attachment points for earmuff adapters.

PERFORMANCES

Protection against top impacts	K	5 kg from 2 m 100 J	Chinstrap release	K	>15 kg <25 kg
Protection against side, front and rear impacts	K	5 kg from 1 m 50 J	Retention system effectiveness	K	
Protection against the penetration of objects	K	3 kg from 1 m 30 J	Protection against side deformation	K**	

K Required performance tests

K** Additional tests performed to meet optional requirements

ADDITIONAL INFORMATION

3 **10**
YEARS GUARANTEE YEARS SHELF LIFE

SHELF LIFE

10 years starting from the date of manufacture. The helmet must be checked regularly and before each use to detect the presence of any damage such as cracks, detachments, deformities, or peeling that represent factual elements of the state of deterioration of the helmet. Helmets that have suffered a severe impact shall be replaced even if they do not show obvious signs of damage.

GUARANTEE

3 years starting from the date of purchase.

CLEANING

Clean the helmet with the KASK Helmet cleaner or with water, neutral pH soap and a soft, clean cloth. The inner lining should be washed by hand in cold water or in the washing machine (max 30°C - 85°F). The KASK Liner Refresher is available to neutralise unpleasant odours.

STORAGE

The helmet should be stored away from direct sunlight or source of heat. We recommend the use of the KASK drawstring helmet bag to protect the helmet when not in use.

ADHESIVE APPLICATION

Do not apply adhesives, stickers or use paint and solvents on the helmet that do not comply with the manufacturer's specifications. Any alteration or intervention may impair its protective function.
